

PRIVACY

COMMON RIGHT

Privacy is a right granted to every individual. Privacy is at the heart of freedom of expression, association and assembly. All this is necessary for a free and fully democratic society. Also on the internet.

SAFETY RULES

To keep yourself safe online, follow these 10 online safety rules:

- Use strong passwords
- Use only trusted networks
- Use dongles
- Use antivirus software
- Don't open suspicious emails
- Keep your browser and operating system up to date
- Only visit secure sites

- Don't act on emotions
- Do not click on pop-up screens and suspicious ads
- Do not provide your personal information

STRONG PASSWORDS

The phrase strong password is understood as a set of characters in the form of letters, numbers and special characters, which has a total of more than six. It's best to have a password of at least 12 characters. Such, however, is much harder to remember, so it is worth using the principle: the more, the better.

ANTI-VIRUS SOFTWARE

To some extent, antivirus software is a barrier to protect our devices from unwanted malware. The larger the virus information database in a given antivirus software, the better and faster the antivirus will block malware.

COPYRIGHT

Copyright belongs to the creator of any work – the created work does not even have to be finished and can have a variety of forms. If you don't know what copyright is, we also invite you to read the summary of the most important information about copyright, which we discussed in an earlier article. Copyright begins immediately, i.e. from the moment you start working on the work. However, it is worth considering what to do in the event that the creator wants to transfer the copyright to someone else?

HOW TO TRANSFER COPYRIGHT?

The institution of copyright transfer is very popular among many creators. It is directly related to the desire to obtain benefits from the created works. In the case of a complete transfer of copyright, the author transfers to the buyer the right to dispose of the work and derive further profits from it.

BROCHURE DEVELOPED BY PARTICIPANTS OF THE PROJECT "AWARE AND SAFE ON THE INTERNET. DEVELOPMENT OF DIGITAL COMPETENCES OF STUDENTS OF ZESPÓŁ SZKÓŁ CENTRUM KSZTAŁCENIA PRAKTYCZNEGO IN SOCHACZEW", WHICH IS FUNDED BY THE EUROPEAN UNION.

Don't share passwords.
Choose unique
and hard-to-guess passwords

Use antivirus programs

Only visit trusted sites

Respect the property, culture, and
privacy of others online
